Attention: Anna Coates

Subject: Final Remedial Investigation Report
RI/FS and IRAM Development
Astoria Area-Wide Petroleum Site
Astoria, Oregon
DEQ ECSI File #2277

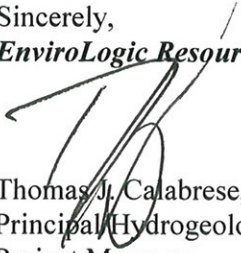

Dear Ms. Coates:

Enclosed are four copies of the Final Remedial Investigation Report, submitted on behalf of the Astoria Area-Wide Cooperating Parties as described in DEQ Order No. ECSR-NWR-01-11 and "RI/FS and IRAM Development Work Plan, Phase 1," dated July 15, 2002. The report is comprised of three volumes. The enclosed documents replace those in binders provided previously. Only those sections of the draft RI Report that have changed have been reproduced for this submittal. Specifically, please replace the text, figures, Appendices E, G, H, and J in your draft binders with the enclosed updated copies. Additional pages to Appendix D are also provided.

The Remedial Investigation Report presents the results of investigations conducted at the Astoria Area-Wide site over the last five years, the Ecological Risk Assessment, and Human Health Risk Assessment. The next step toward cleanup is to conduct the Feasibility Study, which is being initiated forthwith. The Feasibility Study will address those areas where unacceptable risks have been identified in the risk assessments and will likely be conducted on an AOC-by-AOC basis by subgroups of the Astoria Area-Wide Cooperating Parties. A specific plan of action for the Feasibility Study will be provided to DEQ.

Please call me at (503) 768-5121 if you have any questions or comments.

Sincerely,
EnviroLogic Resources, Inc.

Thomas J. Calabrese, RG, CWRE
Principal Hydrogeologist
Project Manager
